3. If prompted to allow the download, please allow it by clicking “yes” or “accept.” This will then begin the download of AVG. If you are using Google Chrome as your web browser, you will see the download begin in the bottom left corner of your browser.

Once the download is complete, click on it.

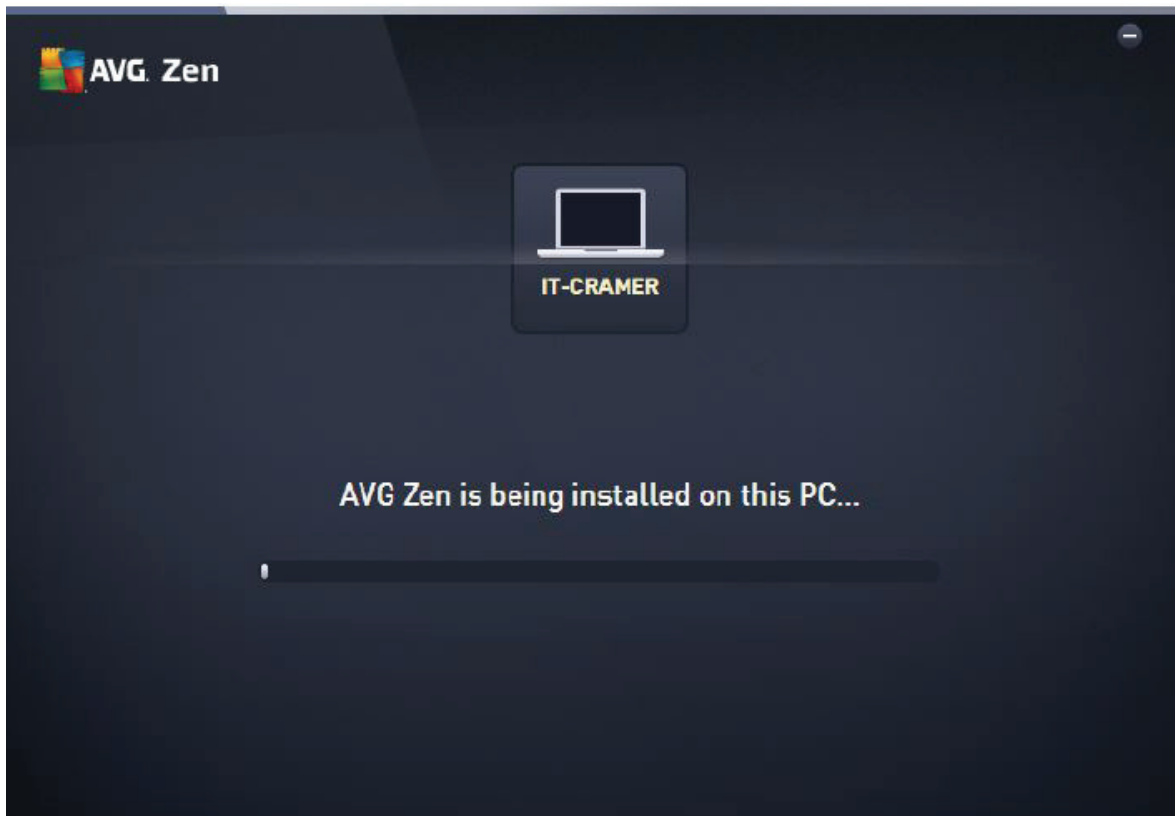

4. Allow the files to extract.

5. Choose the desired language and then click “Agree and Install” to accept the license agreements and install AVG.

6. This will then initiate the AVG Installation. Please wait while the software is installed.

7. Once the software is installed, you will see AVG start up and continue installation from within the software.

8. Once you see the following on the screen, AVG is fully installed. Virus definitions will begin updating as soon as the installation is complete. Once definitions are downloaded completely, your computer will be protected by AVG.
